Driving Safety
Reduce Driver Distraction on the Move

Your people are your most valuable assets. Whether they are driving a forklift truck in the warehouse or a commercial vehicle on the road, you need to protect your workforce. Getac's Driving Safety App is a value-added solution aimed at reducing driver distraction.

Discover a cost-effective and reliable way to safeguard your workforce.

Reduce Distracted Driving
Protect drivers from in-vehicle device distractions on the move by blanking the screen and locking the keyboard, in compliance with regional driving legislation.

Pure Software Solution
Getac Driving Safety requires no additional hardware, offering maximum reliability, preventing any bypassing of the solution, and ensuring compliance with safety guidelines.

Cost-Effective Solution
One-time payment for perpetual license is a cost-effective way to safeguard your workforce, protecting your most valuable assets.

Workforce Safety for Forklift Trucks & Commercial Vehicles

On average, there are approximately

30,000
forklift truck accidents reported annually across Europe

Source: European Agency for Safety and Health at Work (EU-OSHA)

20%
of truck accidents are caused by driver distraction

25%
of van accidents are caused by driver distraction

Source: European Road Safety Observatory (ERSO), Eurostat, and National Transport Agencies

Software Features

Screen Blanking
Blank the vehicle-mounted computer LCD when the vehicle is on the move.

Dual Mode Support
Indoor Mode uses the Getac device's built-in motion sensor to detect motion, whilst Outdoor Mode utilizes a GPS signal.

Auto Switch
Auto detects and switches between GPS and motion sensors.

Designated App in Motion
Only selected applications, allowed by the administrator, can be launched in motion.

Smart Docking
Screen blanking functionality is enabled when the device is docked in-vehicle, then automatically disabled when the device is undocked for field operation.

Multiple Language Support
12 languages supported.
