

## Getac Wins “Material Handling Solution of the Year” In 2024 SupplyTech Breakthrough Awards Program

*Annual Awards Program Recognizes Innovation in the Global Supply Chain Technology and Logistics Industry*

**TELFORD** - July 16, 2024 – [SupplyTech Breakthrough](#), a leading independent market intelligence organization that evaluates and recognizes standout technology companies, products and services in the supply chain technology and logistics industry around the globe, today announced that [Getac Technology Corporation](#), a leading producer of rugged technology, has been selected as winner of “Material Handling Solution of the Year” in the annual SupplyTech Breakthrough Awards program.

Industrial tablets are indispensable in warehouse environments, offering workers the processing power of enterprise-grade systems while withstanding the extreme conditions of hazardous environments. Getac’s rugged technologies provide solutions for warehouse and material handling scenarios to ensure efficient workflows, accurate record keeping, cost reduction, and minimizing handling errors.

Getac's turnkey solutions can be fully customized by seamlessly integrating the tablets into specific warehouse vehicles or workflows. From mounting devices on forklifts, pallet trucks, reach trucks, and pallet riders to integrating with a conveyor belt system for real-time tracking and improving workflow, Getac addresses everyday challenges in material handling and warehouse management. The company’s fully rugged tablets, including F110, UX10, and ZX10, are built to military standards and can withstand drops, dust, and extreme temperatures.

Beyond hardware, Getac’s software solutions boost productivity and operational efficiency with an enterprise suite that assists with device management, deployment and configuration. The software comprises the Getac Device Monitoring System, Getac deployXpress, and GetacOEMConfig, which enhances the enterprise-scale configuration capabilities of AER-certified EMM systems. The Driving Safety Utility screen blanking feature also reduces distracted driving and promotes workforce safety for forklifts and commercial vehicles.

In terms of services, Getac's Self-Maintainer program empowers users to address minor issues and replace consumable parts as well as provides training documents, videos, and access to Getac’s service system.

“Mobile accessories promote worker comfort and efficiency with hands-free functionality. Industrial organizations are prioritizing improving supply chain performance and putting an

emphasis on product innovation,” said Mike McMahon, President of Getac North America. “This award from SupplyTech Breakthrough underscores our drive to improve working conditions by equipping teams with high-performance, mobile and rugged solutions. The flexibility of our tablets delivers a huge advantage in busy operational environments and plays a key role in improving productivity, efficiency, and the ability to maintain high-performance operations, even in the most demanding situations.”

The mission of the annual SupplyTech Breakthrough Awards program is to conduct the industry’s most comprehensive analysis and evaluation of the top technology companies, solutions and products in the supply chain and logistics industry today. This year’s program attracted thousands of nominations from over 15 different countries throughout the world.

“Getac’s rugged mobile devices, software suite, and commitment to security and support translate to operational excellence in warehouse management. In the ever-evolving supply chain landscape, warehouses are looking to optimize operations and achieve sustainable growth through robust technology that can transform their many areas of operation,” said Bryan Vaughn, Managing Director of SupplyTech Breakthrough Awards. “Getac’s solutions empower warehouses to streamline workflows, improve worker productivity, and minimize downtime, ultimately contributing to a more profitable and efficient operation. It’s our pleasure to award Getac with ‘Material Handling Solution of the Year!’”
